

Amendments to the Specification

Please replace the paragraph beginning at page 13, line 11, with the following rewritten paragraph:

1. Primary PC Heuristics to determine which PC would be the best suited to be the ICS machine (Internet Connection Sharing machine) or best suited to be the PC in the same room as the hardware gateway.

Please replace the paragraph beginning at page 20, line 1, with the following rewritten paragraph:

- e) This has one ~~caveat~~ caveat: when the laptop is the primary PC, we show RG's before ICS because it is a bad user experience (i.e. not having the laptop there and on all the time) even though setup is more difficult and expensive.
